7. Notification Preferences for Store

As a Nimbus user,

I want to see only the Store notification settings applicable to my region, role and account configuration,

so that I can manage only the notifications for which I am eligible.

Functional Requirements

FR 1: Display the Store category under My Profile > Notification Settings only when both of the following conditions are met:

- The user's Contact Web App includes Store.
- The associated Account Store Flag is set to True.

FR 2: If either of the Store category eligibility conditions is not met, the Store category and all its notification subcategories must be hidden.

FR 3: Evaluate the visibility of individual Store notification subcategories only after the user meets the general Store category eligibility conditions.

FR 4: Make the Approval Status notification subcategory available in both North America and EMEA.

FR 5: In North America, display Approval Status only when:

- The user's Role is Customer Lead or Customer Manager.
- The associated Account Assigned Features contains 24HG (Extended Catalog Approval).

FR 6: In EMEA, display Approval Status only when:

- Account Type is Customer.
- The user's Role is Customer Manager or Customer User.
- Contact Approval Process Required is set to True.

FR 7: Make the Billing notification subcategory available in North America only.

FR 8: Do not apply any additional role-based eligibility logic to Billing.

FR 9: Make the Order Status notification subcategory available in North America only.

FR 10: Do not apply any additional role-based eligibility logic to Order Status.

FR 11: Billing and Order Status must remain subject to the general Store category eligibility conditions, even though they have no additional role logic.

FR 12: Do not display Billing or Order Status to EMEA users.

FR 13: Determine visibility using the current user's Contact information and associated Account configuration.

FR 14: Display only the Store notification subcategories for which the current user satisfies all applicable regional and eligibility conditions.

FR 15: Apply the visibility rules only to the notification preferences displayed under My Profile > Notification Settings.

FR 16: The implementation must not change the underlying email-notification delivery logic unless this is specified separately.

FR 17: The visibility matrix must be completed and confirmed for all existing North American and EMEA email notifications before the corresponding notification settings are implemented.
