Notification Template

Purpose: Reusable template for defining future Nimbus notifications. Fields marked as Picklist should use controlled values in Salesforce.

	Field	Field Type	Description / Expected Input	Picklist Options
1	Notification Name	Text	Business-friendly name of the notification.	—
2	Notification ID / Key	Text	Unique technical identifier for the notification.	—
3	Source Application	Picklist	Nimbus application responsible for the notification.	Store; Insights; Support; General; Color; Stock

4	Topic / Preference Group	Picklist (dependent)	Customer-facing grouping used in Notification Preferences. Multiple backend notifications may belong to the same topic.	Values maintained per Source Application. Store example: Order Status; Billing, Order Approval
5	Notification Title	Text	Title displayed in the Bell notification and/or email.	—
6	Notification Message	Long Text	Content of the notification. May include supported dynamic values.	—
7	Target URL	URL / Text	Optional Nimbus destination opened when the user selects the notification.	—

8	Trigger Definition	Long Text	Clearly describes the event or conditions that cause the notification to be generated. For a manually initiated notification, describe when the business user is expected to send it.	—
9	Trigger Source	Picklist	Identifies where the notification initiation originates.	Salesforce; Connected Application
10	Application Access (Contact Web Application)	Picklist	Nimbus application access the recipient must have to be eligible.	Store; Insights; Support; Not Applicable; Stock, Color
11	Web Store (Storefront)	Multi-select picklist	Which Nimbus Site does this notification need to be displayed?	Nimbus EMEA, Nimbus (NA CB), ~~Axalta Latam Store, Explore Axalta.~~
12	Country	Picklist (dependent on Region)	Country or countries to which the notification applies.	Use the existing Nimbus / Salesforce country values

13	Role	Picklist - Multi-select	Nimbus user roles eligible to receive the notification.	Manager; Standard User; All Roles, Customer Lead,
14	Delivery Channel	Picklist - Multi-select	Channel or channels through which the notification should be delivered.	In-App; Email, SMS
